

The finely sparkling, premium mineral water

## Detailed information about Staatl. Fachingen MEDIUM

**Product name:** Staatl. Fachingen MEDIUM

**Product description:** Staatl. Fachingen MEDIUM is finely sparkling, premium mineral water from the famous Staatl. Fachingen spring. Thanks to its high, balanced mineral content, the water is wholesome and pleasantly revitalising – with a modern, subtle carbonation level of 4.8 g/l. It is sold in an aesthetic, clear, faceted bottle with a sophisticated blue and white label.

**Further benefits:** Thanks to its rich combination of minerals and naturally high level of hydrogen carbonate (over 1,800 mg/l), Staatl. Fachingen neutralises acids that can have a negative effect on the body. In this way, it keeps the body's sensitive natural acid-base balance in check, helping consumers to enjoy life to the full, be it at home, at work or in their free time. Staatl. Fachingen MEDIUM also stands for well-being, quality and modern design. In as far back as 1742 a medical opinion testified to the positive effects of this water, which is therefore known as one of Germany's oldest functional foods. Staatl. Fachingen MEDIUM has also been proven to have a beneficial effect on the skin, making it a source of beauty from within. The combination of Staatl. Fachingen MEDIUM's natural, functional health-supporting properties and its unique taste makes this mineral water ideal for anyone who wants to enjoy an active, energetic life. The elegant bottle is perfect in terms of both its contents and its design.

The water. Since 1742.

<b>Mineral content:</b>	Hydrogen carbonate:	1,846 mg
